INTRODUCTION

프로젝트 추진 배경

150,000 international students come to Korea every year. This number continues to rise.

Because of the young age and inexperience in living in a foreign country, they might come across many difficulties in adapting to new environment (lifestyle).

As senior foreigner students ourselves, we have faced many difficulties adapting to a new education system and new environment such as registration to courses, joining clubs, etc.

INTRODUCTION

설문조사 결과

92%

Of our participatns were interested in our community based website

Because more than 70% of them were having a difficult time in searching the needed information. So, 80%. are willing to join the community and to help one another

How to fit in living in Korea

There is not much help for the foreign students looking for a job after graduation

I find that making friends with Koreans is hard.

It would be better if we have translation of all the notice, announcement at the university.

The food problem and everything is expensive

The university doesn't have a buddy system to help foreign students to integrate into the new environment and do language/cultural exchange.

Some of the students probably don't need such a thing as they can easily increase their contacts or new people/friends they got to know, but others can not smoothly adapt.

I am tired of translating for exchange students in class. They should learn korean before applying for class, not coming to korea hoping people would speak english just because they are foreigners. Maybe give tips about basic korean in the website.

Hello there:) I would like to get recommendation for language institutes run by universities. If you have experience in one of those institutes, where is it?

Hi everyone! I'm looking to transfer money from my home country to my Korea bank account after I arrive in Korea. What would you say is the best option to not lose that much money to transfer fees and so on. Should I send the whole amount at once or rather split it up?

Edit** I can't comment because it's new account thanks for everyone who answered me 🙏❤️
Hello everyone 🙌
I have some questions about scholarship and studying in South Korea.. I've done some researches but there's still some things I can't find ..
1. Is the Korean language necessary to study ? 2. What's the needed degree I am suppose to have to study the bachelor program ?
I have a diploma degree in Medical Laboratory Sciences "College degree" I don't know if this certification avowed in other countries like Korea ?
If someone know what I'm talking about or if there's any scholarship student for bachelor degree could help me to find answers please.. and thank you so much 🙏

How much do you normally pay for rent in seoul?
In wat 구 or 동 would be the cheapest???

I feel like they ask more off-Seoul unless its Gangnam and stuff
Also would it be absolutely impossible to get somewhere to stay for like less than 200,000won/month???

😂👍 26 74 comments

INTRODUCTION

프로젝트 필요성

01

Makes it easier for new students

New students who come to Korea, especially those who have near zero knowledge of the language often find it extremely hard. We want to help them to not feel lost despite not knowing the language.

02

Saves time in information searching

Often times, the information needed exists on the Internet but because they are scattered, it takes more time to search.

03

Connects with fellow foreigners

Most of foreigners often only know a little other foreigners and this limits their option of people to ask about things or help from.

INTRODUCTION (프로젝트 소개)

Reachaliens

Is a community-based website platform aiming to help international students coming to South Korea adapt to the new environment. Our target mainly will be international students at Kookmin University. It will provide useful information about student life and general life overall. Basically, in our platform, students will be able to connect to each other, share information about studying, help each other through our community. They will also be provided with basic and life style information such as restaurant searching, registration of courses, tourist attractions, accommodations, etc.

Target group

Communication

NEXT

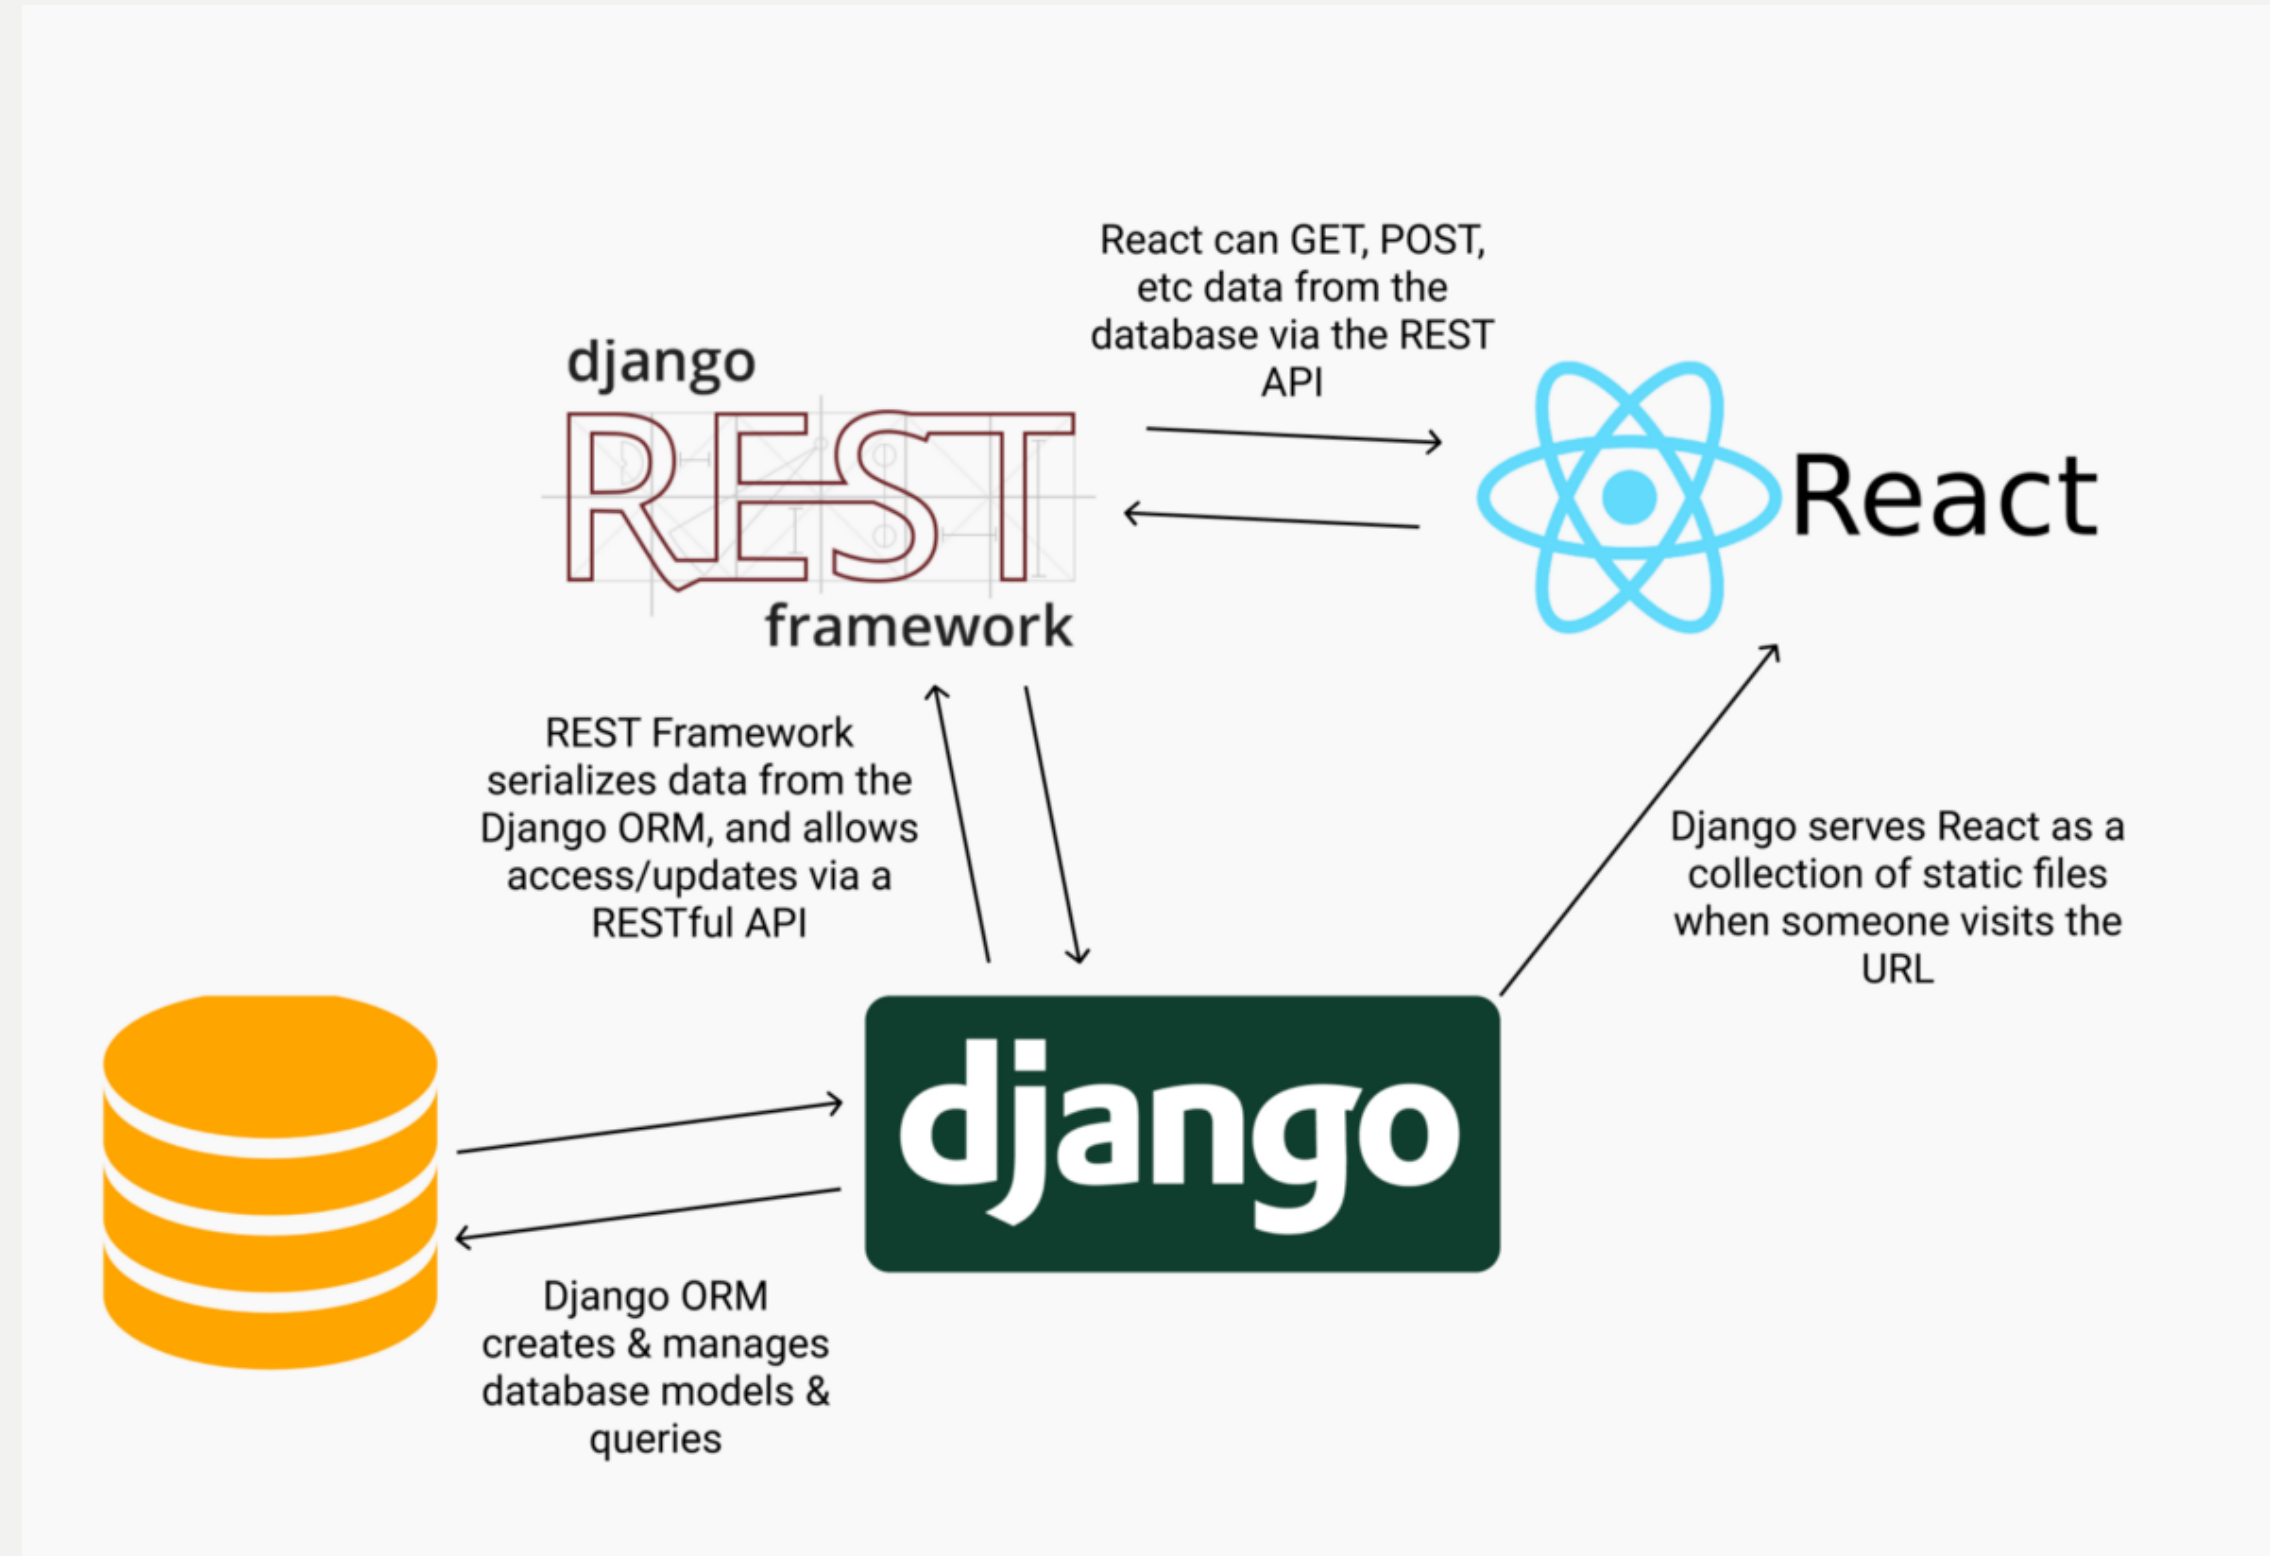

OUR GOAL

- To simplify finding information related to studying and lifestyle in Korea
- Provide a platform where foreigners can share their tips, insights and help each other
